

SECTION 1 IDENTIFICATION OF THE MATERIAL AND SUPPLIER

GHS Product identifier: Pharma-Chemical Pharmonia
Other means of identification: Pharmonia
Recommended use of the product: Disinfectant wash for animals
Supplier's Details: Pharmachem
Unit 6, 70 Fison Ave West
Eagle Farm QLD 4009
Telephone: (07) 3868 0333
Facsimile: (07) 3868 0344
Contact Person: Mr Gray Boston
Emergency phone number: (07) 3630 1654

SECTION 2 HAZARDS IDENTIFICATION

Classification of Product:

This product is classified as a health hazard in accordance with the following classification criteria of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS), Third Revised Edition.

Health hazards: Causes skin irritation and serious eye damage

Skin corrosion/irritant Category 2

GHS label elements, including precautionary statements:

Pictogram:

Signal word: Warning

Hazard statements: Causes skin irritation

Precautionary statements:

Prevention: Keep out of reach of children
Wear suitable protective clothing and gloves
Do not eat drink or smoke when using this product
Wash hands thoroughly after handling

Response: If on skin wash with plenty of soap and water
If skin irritation occurs get medical advice/attention

Eye corrosion/irritant Category 1

GHS label elements, including precautionary statements:

Pictogram:

Signal word: Danger

Hazard statements: Causes serious eye damage

Precautionary statements:

Prevention: Avoid contact with eyes. Wear safety glasses / goggles
Wash hands thoroughly after handling

Response: If in eyes rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical advice.

Other Health Hazards: None known

SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS

Ingredients	Cas No.	Proportion
Cresylic Acid (Mixed Cresols)	1319-77-3	30 g/L
Sodium hydroxide	1310-73-2	10 g/L
Potassium hydroxide	1310-58-3	<5 g/L
Oleic acid	112-80-1	<60 g/L
Water	Not Applicable	QS 1 L

SECTION 4 FIRST AID MEASURES

The following First Aid directions have been set for this product by the Office of Chemical Safety and Environmental Health (OCSEH) of the Commonwealth Department of Health and Aging:

If poisoning occurs, contact a doctor or Poisons Information Centre. *Phone Australia 131126*. If swallowed, do NOT induce vomiting. Give a glass of water. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor. If spilt on skin, remove any contaminated clothing, wash skin thoroughly with soap and water, then methylated spirit. (*FAISD Handbook, Handbook of First Aid Instructions, Safety Directions, Warning Statements, and General Safety Precautions for, Agricultural and Veterinary Chemicals*)

First Aid Facilities: Ensure adequate eye wash / wash-down facilities are available

SECTION 5 FIRE FIGHTING MEASURES

This material is approximately 90 % w/v water. It is not expected to be the source of a fire hazard. However, if it is involved in a fire the following information should be considered based on the presence of mixed cresols in the product.

Suitable extinguishing media: Dry chemical, water spray, fog or foam. Do not use water jet.
Hazards from combustion products: This product contains 3% mixed cresols. Cresols in their pure form will produce toxic fumes and carbon oxides when burned and may be explosive. They will react with metals and may evolve flammable hydrogen gas. They are highly reactive with oxidizing agents, sulfuric or nitric acids.

Special protective precautions and equipment for fire fighters: Fire fighters should wear full protective equipment, including self-contained breathing apparatus.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Emergency procedures: Contain spills using impervious materials or inert absorbent materials. Do not allow material to enter waterways or sewers.

Methods and materials for containment and clean up: Spills should be absorbed with inert material such as clay or proprietary clean up materials and placed in drums or other receptacles for transport to an approved local authority disposal facility. Workers cleaning up spilled product should wear eye protection and clothing to protect the skin.

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling: Keep away from heat. Do not allow to stand in direct sunlight. When handling the concentrate and applying the product, wear safety glasses / goggles, chemical resistant gloves and suitable protective clothing.

Conditions for safe storage, including any incompatibilities: Keep lid tightly closed. Store in a cool dry place, below 30°C (Room Temperature). Do not store with strong oxidizing agents. Do not store where product may come into contact with metals such as brass, copper, aluminium or bronze.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

National exposure standards:

There are no exposure standards set specifically for this product. However, the product contains 3% w/v mixed cresols and the following information is provided with respect to the presence of this material in the product:

Time Weighted Average (TWA)

For mixed cresols: 22 mg/m³ (TWA) skin
5 mg/kg (ppm) skin

Engineering controls: Natural ventilation only except in confined spaces where a local exhaust should be provided

Personal protective equipment: Equipment to protect eyes and skin should be provided when handling the concentrate

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Clear, amber, moderately viscous liquid
Odour: Phenolic
Specific gravity or density: 1.00 – 1.01
pH: 9.8 – 10

SECTION 10 STABILITY AND REACTIVITY

Chemical stability: Stable
Conditions to avoid: Heat, flames, ignition sources, incompatibles
Incompatible materials: Avoid contact with strong oxidising agents, nitric and sulfuric acids.
Hazardous decomposition products: Oxides of carbon
Hazardous reactions: Hazardous polymerisation has not been reported.

SECTION 11 TOXICOLOGICAL INFORMATION

Routes of Exposure:

Exposure to Pharmonia can occur through ingestion and eye or skin contact. The major routes of exposure are expected to be eye and skin contact. There are no toxicology data available for Pharmonia. Acute data for mixed cresols has been supplied.

Signs and symptoms of exposure:

Irritating to skin and causes serious eye damage. May cause damage to mouth and oesophagus if ingested

Summary of Toxicology:

Acute toxicity:

Toxicity to Mammals (Mixed Cresols):

Acute oral LD ₅₀	Rats	1454 mg/kg
	Mice	760 mg/kg
	Rabbit	1400 mg/kg
Acute dermal LD ₅₀	Rabbit	2000 mg/kg

SECTION 12 ECOLOGICAL INFORMATION

Information has been provided for cresols as these are the most environmentally significant component of the product.

Ecotoxicity:

Fish:	24hr - LC ₅₀ values for fish are 15-30, 21-25, and 14-21 mg/L
Benthic crustaceans:	Concentrations below 0.525-0.70 mg cresols/L of water were not acutely toxic
Birds:	Moderately toxic to birds (Some acute oral LD ₅₀ values are: mallards, 1485 mg/kg; pheasants, 167 mg/kg; blackbirds and starlings, over 100 mg/kg; and chickens, 525 mg/kg)
Aquatic invertebrates:	Highly toxic to aquatic invertebrates
Aquatic stages of amphibians:	Highly toxic

Persistence and degradability:

Cresols degrade rapidly in the environment and concentrations in water, even in worst case conditions, would not approach the levels that would pose a chronic aquatic toxicity hazard. Their half-life is 70 days or less.

Mobility:

The vapor pressure of the isomeric cresols suggests that these compounds will evaporate slowly. The relatively high water solubility of the cresol isomers indicates that wet deposition may remove them from the atmosphere. This is confirmed by the detection of cresols in rainwater. The short atmospheric residence time expected for the cresols suggests that cresols will not be transported long distances from their initial point of release. All cresol isomers appear to be rapidly removed from environmental media.

Environmental precautions: Do not contaminate sewers or waterways with product or used container.

SECTION 13 DISPOSAL CONSIDERATIONS

Disposal methods for product and containers:

Do not burn product or containers. Do not wash spilled material into sewers, drains or other waterways. Dispose of unwanted product and materials collected from spillage cleanup in accordance with local authority instructions.

Special precautions for landfill or incineration:

Consult your local government authority before disposing of this product in local authority landfill.

SECTION 14 TRANSPORT INFORMATION

Considered dangerous goods for transport under The Australian Code for the Transport of Dangerous Goods by Road and Rail (ADG Code) and IATA Dangerous Goods Regulations

UN Number: 2076
UN Proper Shipping Name: Cresols

Class: 6.1
Subsidiary Risk: 8
Packaging Group: II
Hazchem Code: 2X

SECTION 15 REGULATORY INFORMATION

This product has been registered by the Australian Pesticides and Veterinary Medicines Authority (APVMA). In granting registration to any product, the APVMA has exercised its legislative responsibility to ensure that the product is suitably formulated and properly labelled and, when used according to instructions is:

- safe to the host, the user, consumers and the environment;
- efficacious (that is, the product does the job it claims it shall do); and
- not unduly prejudicial to trade.

The APVMA uses the services of a number of Australian and State government agencies as advisers to help with some of these evaluations of applications for registration of agricultural and veterinary chemical products. These include:

- the Office of Chemical Safety and Environmental Health (OCSEH) of the Commonwealth Department of Health and Ageing which:
 - evaluates and reports on toxicology and metabolism studies; proposes first aid and safety directions; determines poison schedule classifications; and establishes acceptable daily intakes (ADIs) and acute reference doses (ARfD); and
 - evaluates the occupational health and safety aspects of an application and recommends safety directions and occupational controls on use and advises on a Material Safety Data Sheet (MSDS);
- the Commonwealth Department of the Environment and Heritage (DEH) which evaluates environmental data and recommends appropriate use controls and instructions for the product that will protect the environment; and
- State and Territory departments responsible for agricultural and primary industries which evaluate and reports on efficacy and target crop or animal safety data for new agricultural chemicals and new uses of registered products. In some cases the APVMA contracts this work out to other agencies such as universities, the CSIRO or to other experts.

This product is not listed as a poison in the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP) published by the National Drugs & Poisons Scheduling Committee (NDPSC).

SECTION 16 OTHER INFORMATION

MSDS version:	3
Date of Revision:	May 2016
Update of sections:	Update to GHS
